Studio Apartment Path Standard

AID-SPC-006

1. Purpose

This standard defines the complete customer input path after Studio Apartment is selected in AID-SPC-001. Because the selection represents a whole-property furnishing request, AIDOOi proceeds directly to studio-specific information without asking which room the customer wants to furnish.

2. Entry Condition

Trigger: Customer selects **Studio Apartment** in the Step 1 question, *What are you furnishing?*.

3. Studio Apartment Customer Path

Step	Input	Requirement / Reference
1	Total Area	Required
2	Preferred Sleeping Setup	Required
2A	Preferred Bed Size	Conditional - Required for Standard Bed - Ref: AID-CAT-004
3	Floor Plan / Layout	Optional - recommended when available
4	Property Photos	Optional
5	Style Preference	Ref: AID-DATA-009
6	Colour Preference	Ref: AID-DATA-007
7	Budget Tier	Ref: AID-LOG-001
8	Recommendation	Proceed to matching and whole-studio composition

4. Total Area

Total studio area is **required**. Length and width are not mandatory because studio layouts may be irregular. AIDOOi uses the total area as the primary mandatory size input, while an uploaded floor plan may provide additional spatial detail.

5. Preferred Sleeping Setup

Preferred Sleeping Setup is **required**. The MVP options are: **Standard Bed / Sofa Bed / Space-Saving or Convertible Solution**. This selection materially affects the studio layout and product composition.

6. Conditional Bed Size

If **Standard Bed** is selected, Preferred Bed Size becomes **required**. Bed-size values must follow **AID-CAT-004 - Beds Standard**. For Sofa Bed or Space-Saving / Convertible Solution, this Bed Size question is not required.

7. Floor Plan and Photos

Floor Plan / Layout and property photos are **optional**. They may improve spatial understanding and recommendation accuracy, but their absence must not prevent the customer from completing the Studio Apartment path.

8. Style Preference

Style preference must use the controlled structure defined in **AID-DATA-009 - Product Style Standard**.

9. Colour Preference

Colour preference must use the controlled colour structure defined in **AID-DATA-007 - Product Colour Standard**.

10. Budget Tier

Budget is collected using the common AIDOOi tier names: **Essential / Value / Standard / Premium / Luxury**. The monetary ranges applicable to the Studio Apartment path are governed by **AID-LOG-001 - Budget & Price Matching Logic**.

11. Recommendation Handoff

After the required inputs are complete, AIDOOi proceeds to product matching and a complete Studio Apartment composition. No additional Studio-specific questions are required by this standard.

12. Lean Input Principle

Additional Studio Apartment questions should not be introduced unless MVP testing demonstrates that they materially improve recommendation quality.
