AID-CAT-007 | REVISION 1

RUGS & SOFT FURNISHINGS STANDARD

Classification taxonomy and practical AI-matching attributes for Rugs & Soft Furnishings in AIDOOi

1. Scope

This standard defines the approved classification structure and category-specific practical attributes for Rugs & Soft Furnishings in AIDOOi. The taxonomy identifies the fundamental product type while shape, size, colour, material, pattern, style and care characteristics remain structured attributes.

2. Classification Structure

Main Category: Rugs & Soft Furnishings

Category	Approved Subcategory / Product Type
Rug	Area Rug; Runner Rug
Cushion	Decorative Cushion
Throw	Throw / Blanket
Curtain	Curtain
Bedding Textile	Bedspread / Coverlet

3. Product Type Definitions

Product Type	Working Definition
Area Rug	Freestanding floor textile intended to cover and define a localized area of a room.
Runner Rug	Long, relatively narrow rug whose proportions and intended use suit corridors, entryways or other elongated spaces.
Decorative Cushion	Soft filled furnishing primarily used for comfort, styling or accent on seating or beds.
Throw / Blanket	Loose soft textile intended for layering, warmth or decorative use on seating or beds.
Curtain	Hanging textile furnishing intended primarily for window covering, privacy, light control or decoration.
Bedspread / Coverlet	Decorative or functional textile layer designed primarily to cover a bed.

4. Features That Remain Attributes

Information	Store As	Examples
Shape	Attribute	Rectangular; Round; Oval; Irregular
Size / Dimensions	Dimensions	160 x 230 cm; 200 cm diameter; etc.
Primary / Secondary Colour	Universal Colour	Controlled values under AID-DATA-007
Material	Universal Material	Wool; Cotton; Polyester; Jute; etc.
Pattern	Attribute	Solid; Geometric; Floral; Abstract; etc.
Pile Height	Rug Attribute	Low; Medium; High
Indoor / Outdoor	Attribute	Indoor; Outdoor; Both
Washable	Attribute	Yes / No
Reversible	Attribute	Yes / No
Style	Universal Style	Governed by AID-DATA-009
Suitable Room	Attribute	Living Room; Bedroom; Dining; Entryway; etc.

5. Rug Shape Rule

Rug shape does not create a new Product Type. A round wool rug remains Rugs & Soft Furnishings -> Rug -> Area Rug, with Shape = Round, Material = Wool and its diameter stored as a dimension.

6. Runner Rug Rule

Runner Rug remains an independent Product Type because its elongated proportions are closely connected to a distinct placement and use case, particularly hallways and entryways. This distinction can materially improve spatial matching in AIDOOi.

RUGS & SOFT FURNISHINGS STANDARD

7. Practical Attributes - MVP

These attributes support spatial fit, maintenance, textile use and practical customer matching. Universal Colour, Material, Style and general product data remain governed by the relevant AID-DATA standards.

Attribute	Requirement	Controlled / Data Rule	Primary Matching Use
Shape	Required	Rectangular / Round / Oval / Square / Irregular	Spatial and visual fit.
Pattern	Required	Solid / Geometric / Floral / Abstract / Striped / Other verified	Visual preference and room coordination.
Indoor / Outdoor	Required	Indoor / Outdoor / Both	Environment suitability.
Washable	Required	Yes / No	Maintenance preference.
Reversible	Required	Yes / No	Use flexibility.
Suitable Room	Recommended	Controlled multi-select room values	Room-specific recommendation.
Pile Height	Conditional	Low / Medium / High	Rug comfort, maintenance and clearance.
Rug Construction	Recommended	Flatweave / Hand-knotted / Hand-tufted / Machine-woven / Other verified	Rug character and care.
Non-slip Backing	Recommended	Yes / No / Unknown	Practical floor-use suitability.
Cushion Fill Included	Conditional	Yes / No	Decorative Cushion purchase completeness.
Cushion Closure	Recommended	Zip / Envelope / Sewn / Other verified	Maintenance and cover removal.
Blackout	Conditional	Yes / No	Curtain light-control matching.
Sheer	Conditional	Yes / No	Curtain privacy/light preference.
Lining	Conditional	Yes / No	Curtain performance and finish.
Curtain Panel Quantity	Conditional	Positive whole number	Window coverage and purchase completeness.
Bed Size Compatibility	Conditional	Single / Double / Queen / King / Super King / verified value	Bedspread/Coverlet fit.

8. Attribute Application Rules

Rule	Standard
Required	Complete for active products unless a controlled Not Applicable treatment is appropriate.
Conditional	Required only when relevant to the Product Type.
Recommended	Capture when reliably known and useful; do not guess construction, care or performance.
Dimensions	Use verified product dimensions; rug diameter or textile width/length should be stored in the appropriate dimension fields.
Universal fields	Do not duplicate Colour, Material, Style, Price, Availability or Images here.

9. Rug Rules

Pile Height applies to rugs and should be captured only when known. Rug Construction should use verified seller/manufacturer information; do not infer hand-knotted, hand-tufted or other construction from appearance. Non-slip Backing is a practical attribute and must not be assumed from photography.

10. Cushion and Throw Rules

For Decorative Cushions, Cushion Fill Included distinguishes a complete cushion from a cover-only product when relevant to the offer. Closure describes how a removable cover is accessed. Throws generally rely on universal material, colour, dimensions and the shared care attributes without unnecessary extra fields.

11. Curtain Rules

Blackout, Sheer and Lining describe verified curtain performance/construction and may materially affect privacy and light-control matching. Curtain Panel Quantity should be captured when the commercial product is sold as a defined set. Do not infer blackout performance solely from dark colour or fabric appearance.

12. Bedding Textile Rule

Bedspread / Coverlet products should capture Bed Size Compatibility when supplied by the seller/manufacturer. Named sizes can vary between markets, so exact dimensions remain important where available.

13. Classification Examples

Product Description	Classification	Key Attributes
Round wool rug, 200 cm	Rugs & Soft Furnishings -> Rug -> Area Rug	Shape = Round; Diameter = 200 cm; Pile as known
80 x 300 cm hallway runner	Rugs & Soft Furnishings -> Rug -> Runner Rug	Size = 80 x 300 cm; Room = Hallway
Patterned sofa cushion	Rugs & Soft Furnishings -> Cushion -> Decorative Cushion	Pattern; Fill Included; Closure as known
Cotton decorative throw	Rugs & Soft Furnishings -> Throw -> Throw / Blanket	Material = Cotton; care attributes as known
Blackout bedroom curtain	Rugs & Soft Furnishings -> Curtain -> Curtain	Blackout = Yes; Room = Bedroom
Quilted bed coverlet	Rugs & Soft Furnishings -> Bedding Textile -> Bedspread / Coverlet	Bed Size Compatibility / dimensions as known

14. Classification Rule

Classify by fundamental textile product identity. Do not create taxonomy branches for shape, colour, material, pattern, size, pile height, washability, style or room placement when these can be represented as structured attributes.

15. Expansion Rule

Add a new Product Type or practical attribute only when recurring real product data cannot be represented accurately within the approved structure and the addition materially improves AIDOOi search, matching, filtering or purchasing.

16. Final Rule

Keep the taxonomy lean: Rugs & Soft Furnishings -> Category -> Product Type. Preserve visual, dimensional, material and care differences as structured attributes whenever possible. Practical attributes should focus on spatial fit, maintenance, environment suitability and meaningful customer decisions.
