AID-CAT-008 | REVISION 1

DECOR & ACCESSORIES STANDARD

Classification taxonomy and practical AI-matching attributes for Decor & Accessories in AIDOOi

1. Scope

This standard defines the approved MVP classification structure and category-specific practical attributes for Decor & Accessories in AIDOOi. Because accessory ranges can expand rapidly, the taxonomy must remain deliberately lean. Shape, material, finish, colour, mounting, room suitability and decorative details remain structured attributes.

2. Classification Structure

Main Category: Decor & Accessories

Category	Approved Subcategory / Product Type
Mirror	Wall Mirror; Floor Mirror
Wall Decor	Wall Art; Decorative Wall Object
Vase	Vase
Decorative Object	Decorative Object / Sculpture
Candle & Holder	Candle Holder / Lantern
Tray	Decorative Tray
Clock	Wall Clock; Table Clock

3. Product Type Definitions

Product Type	Working Definition
Wall Mirror	Mirror primarily designed for wall mounting.
Floor Mirror	Large freestanding or floor-supported mirror primarily intended to rest on or lean from the floor.
Wall Art	Decorative visual artwork intended for wall display, including paintings, prints, canvas works and photographs.
Decorative Wall Object	Non-artwork decorative object primarily intended for wall display.
Vase	Decorative or functional vessel primarily intended for flowers, stems or standalone display.
Decorative Object / Sculpture	Freestanding decorative object or sculptural piece whose primary purpose is visual styling.
Candle Holder / Lantern	Decorative object primarily intended to hold, surround or display candles.
Decorative Tray	Tray primarily used for decorative arrangement, display or light organization.
Wall Clock / Table Clock	Decorative timepiece classified according to its primary placement or mounting format.

4. Features That Remain Attributes

Information	Store As	Examples
Shape	Attribute	Round; Oval; Rectangular; Organic
Material	Universal Material	Glass; Ceramic; Metal; Wood; Stone; etc.
Finish	Structured finish data	Brass; Chrome; Matte Black; etc.
Colour	Universal Colour	Controlled values under AID-DATA-007
Dimensions	Universal Dimensions	Width; Depth; Height; Diameter
Style	Universal Style	Governed by AID-DATA-009
Mounting / Placement	Attribute	Wall Mounted; Freestanding; Tabletop
Set Quantity	Attribute	1; 2; 3; etc.
Suitable Room	Attribute	Living Room; Bedroom; Entryway; Dining; etc.
Indoor / Outdoor	Attribute	Indoor; Outdoor; Both

5. Wall Art Rule

Painting, Print, Canvas, Photograph and similar artwork formats do not create separate Product Types in the MVP. They remain Decor & Accessories -> Wall Decor -> Wall Art, with the specific format stored in an attribute such as Art Type.

6. Mirror Rule

Mirror shape does not create a taxonomy branch. A round brass wall mirror remains Decor & Accessories -> Mirror -> Wall Mirror, with Shape = Round, Finish = Brass and Mounting = Wall Mounted.

7. MVP Scope Control

Artificial plants, planters, diffusers, bookends, bowls, figurines and other accessory types are not automatically added as separate taxonomy branches. They should be introduced only when real seller inventory and matching needs justify their inclusion.

DECOR & ACCESSORIES STANDARD

8. Decor & Accessories Practical Attributes - MVP

These attributes support placement, scale, wall fit, set completeness and decorative matching. Universal product fields remain governed by the relevant AID-DATA standards.

Attribute	Requirement	Controlled / Data Rule	Primary Matching Use
Shape	Required	Round / Oval / Rectangular / Square / Organic / Other verified	Visual and spatial matching.
Mounting / Placement	Required	Wall Mounted / Freestanding / Floor / Tabletop	Placement and installation fit.
Set Quantity	Required	Positive whole number	Purchase/set completeness.
Suitable Room	Recommended	Controlled multi-select room values	Room-specific recommendation.
Indoor / Outdoor	Required	Indoor / Outdoor / Both	Environment suitability.
Art Type	Conditional	Painting / Print / Canvas / Photograph / Mixed Media / Other verified	Wall Art preference and presentation.
Orientation	Conditional	Portrait / Landscape / Square / Other	Wall Art and mirror wall-fit.
Framed	Conditional	Yes / No	Wall Art and mirror presentation.
Hanging Hardware Included	Recommended	Yes / No / Unknown	Installation readiness.
Mirror Mounting Option	Conditional	Wall / Leaning / Freestanding / Multiple verified	Mirror placement flexibility.
Vase Watertight	Recommended	Yes / No / Unknown	Functional flower-use suitability.
Candle Compatibility	Conditional	Tealight / Pillar / Taper / Other verified	Holder functional compatibility.
Tray Food-Safe	Recommended	Yes / No / Unknown	Decorative vs serving suitability.
Clock Power Source	Conditional	Battery / Mains / Mechanical / Other verified	Practical operation.
Clock Display Type	Conditional	Analog / Digital	Customer preference and function.

9. Attribute Application Rules

Rule	Standard
Required	Complete for active products unless a controlled Not Applicable treatment is appropriate.
Conditional	Required only when relevant to the Product Type.
Recommended	Capture when reliably known and materially useful; do not guess performance or compatibility.
Functional claims	Watertight, food-safe, candle compatibility and power source must come from verified product information.
Universal fields	Do not duplicate Material, Colour, Style, overall dimensions, Price, Availability or Images here.

10. Wall Art and Wall Placement

Art Type identifies the artwork format without expanding taxonomy. Orientation can materially improve wall-fit and room-composition matching. Framed and Hanging Hardware Included describe purchase and installation readiness. Decorative motif or subject matter should not become a taxonomy branch and may be added later only if it proves useful to visual matching.

11. Mirror Rules

Wall Mirror and Floor Mirror remain distinct Product Types because their primary placement differs. Mirror Mounting Option may capture verified flexibility, for example a mirror designed for both wall mounting and leaning. Shape remains an attribute rather than a Product Type.

12. Functional Accessory Rules

Vase Watertight should be used only when verified; decorative vessels are not automatically suitable for water. Candle Compatibility should describe the candle format a holder is designed to accept. Tray Food-Safe must not be inferred from appearance or material alone. These fields prevent decorative products from being presented as functionally suitable without evidence.

13. Clock Rules

Wall Clock and Table Clock are classified by primary placement. Power Source and Display Type are practical attributes when known. Decorative style, colour and material remain governed by universal standards.

14. Classification Examples

Product Description	Classification	Key Attributes
Round brass wall mirror	Decor & Accessories -> Mirror -> Wall Mirror	Shape = Round; Mounting = Wall Mounted
Framed abstract print	Decor & Accessories -> Wall Decor -> Wall Art	Art Type = Print; Framed = Yes; Orientation as known

Product Description	Classification	Key Attributes
Ceramic decorative vase	Decor & Accessories -> Vase -> Vase	Watertight only if verified
Small tabletop sculpture	Decor & Accessories -> Decorative Object -> Decorative Object / Sculpture	Placement = Tabletop
Metal candle lantern	Decor & Accessories -> Candle & Holder -> Candle Holder / Lantern	Candle Compatibility as verified
Battery wall clock	Decor & Accessories -> Clock -> Wall Clock	Power Source = Battery; Display Type = Analog if verified

15. Classification Rule

Classify by fundamental decorative product identity. Do not create taxonomy branches for shape, material, finish, colour, style, room placement, mounting or decorative motif when these can be represented as structured attributes.

16. Expansion Rule

Add a new Decor & Accessories Product Type or practical attribute only when recurring real seller inventory cannot be represented accurately within the approved structure and the addition materially improves AIDOOi search, matching, filtering or purchasing.

17. Final Rule

Keep Decor & Accessories deliberately lean: Decor & Accessories -> Category -> Product Type. Expand from real inventory needs, not from every possible accessory name. Practical attributes should focus on placement, compatibility, installation and meaningful customer decisions.
