AIDOOi

AID-LOG-001

PRODUCT PRICE RANGE STANDARD

Revision 1 | MVP

Purpose: Establish one controlled, centralized price-intelligence standard for individual products used by AIDOOi recommendation and budget matching.

1. Purpose and Scope

AID-LOG-001 defines the customer-facing budget tiers and numeric AED price ranges for individual product types in the AIDOOi MVP. It is the single source of truth for product-level price classification.

- This standard covers individual product prices only.
- Room budgets, whole-property budgets, and project allocation logic are intentionally excluded.
- Room composition and room budget logic will be defined separately in AID-LOG-002.
- Studio, full-apartment, and villa project budget logic will be defined separately in AID-LOG-003.
- All ranges are MVP ranges and may be revised later using live inventory, conversion, and market data.

2. Core Price Logic

The five controlled budget tiers are:

- Essential
- Value
- Standard
- Premium
- Luxury

The tier names are shared across categories, while the numeric AED ranges vary by product type and, where materially necessary, by capacity or size.

Core routing pattern: Product Type -> Capacity/Size (when required) -> Budget Tier -> Style -> Colour -> Recommendation.

Customer-facing budget cards should display: Tier Name + Numeric AED Range + Relevant Representative Image.

3. Pricing Rules

- Currency: AED.
- Price basis: Current Selling Price - the current purchasable price paid by the customer.
- Original/List Price is not used for tier classification when a current selling price exists.
- Price changes do not create a new canonical product identity.
- Capacity/size is used as a price branch only when it materially changes the market price structure.
- Attributes such as material, colour, style, finish, door type, LED, storage, weave, shape, and similar features normally remain product attributes rather than separate budget branches.
- Luxury tiers are open-ended unless otherwise specified.
- Where a product is sold as a set and the standard explicitly says 'per unit', normalize to unit price for comparison; otherwise use the total selling price of the set.
- Representative tier images should match the relevant product type and, where applicable, capacity/size.

4. Product Price Range Matrix

4.1 Sofas

Product / Size	Essential	Value	Standard	Premium	Luxury
2-Seater	500-1,500	1,500-2,500	2,500-4,000	4,000-7,000	7,000+
3-Seater	500-1,750	1,750-3,000	3,000-5,000	5,000-8,000	8,000+
4-Seater	1,500-2,500	2,500-4,000	4,000-6,000	6,000-10,000	10,000+
5+ / Sectional	1,500-3,000	3,000-5,000	5,000-8,000	8,000-13,000	13,000+

Budget branch: Seating Capacity / Configuration.

4.2 Seating

Product / Size	Essential	Value	Standard	Premium	Luxury
Dining Chair	50-200	200-400	400-700	700-1,200	1,200+
Accent Chair / Armchair	200-600	600-1,000	1,000-1,600	1,600-3,000	3,000+
Office Chair	100-300	300-600	600-1,000	1,000-2,000	2,000+
Bench	100-400	400-700	700-1,200	1,200-2,500	2,500+
Bar / Counter Stool	50-150	150-300	300-500	500-900	900+

Dining Chair and Bar/Counter Stool are classified per unit. Bench uses total product price.

4.3 Dining Tables

Product / Size	Essential	Value	Standard	Premium	Luxury

2-Person	150-500	500-900	900-1,500	1,500-3,000	3,000+
4-Person	150-500	500-1,000	1,000-1,750	1,750-3,500	3,500+
6-Person	300-700	700-1,200	1,200-2,000	2,000-4,000	4,000+
8-Person	400-800	800-1,500	1,500-2,500	2,500-5,000	5,000+
10+ Person	600-1,200	1,200-2,000	2,000-3,500	3,500-7,000	7,000+

Table only; chairs are excluded. Budget branch: seating capacity.

4.4 Other Tables

Product / Size	Essential	Value	Standard	Premium	Luxury
Coffee Table	75-250	250-500	500-1,000	1,000-2,000	2,000+
Side / End Table	30-150	150-300	300-600	600-1,200	1,200+
Console Table	200-500	500-900	900-1,500	1,500-3,000	3,000+

Shape, nesting, lift-top and storage remain attributes. For a set sold as one product, use total set price.

4.5 Standard Beds

Product / Size	Essential	Value	Standard	Premium	Luxury
Single Bed	250-500	500-800	800-1,200	1,200-2,000	2,000+
Queen Bed	400-700	700-1,100	1,100-1,700	1,700-3,000	3,000+
King Bed	500-800	800-1,300	1,300-2,000	2,000-3,500	3,500+
Super King Bed	600-1,000	1,000-1,500	1,500-2,500	2,500-4,000	4,000+

Bed frame only; mattress is excluded.

4.6 Other Bed Types

Product / Size	Essential	Value	Standard	Premium	Luxury
Bunk Bed	400-700	700-1,100	1,100-1,700	1,700-3,000	3,000+
Daybed	300-600	600-1,000	1,000-1,600	1,600-2,500	2,500+
Murphy Bed	4,000-6,000	6,000-8,000	8,000-11,000	11,000-15,000	15,000+
Headboard	200-500	500-1,000	1,000-2,000	2,000-4,000	4,000+

Bunk/Daybed: frame or structure only; mattress excluded. Murphy Bed: complete bed structure + folding mechanism + cabinet; installation and mattress tracked separately.

4.7 Wardrobes

Product / Size	Essential	Value	Standard	Premium	Luxury
2-Door / Small	300-600	600-1,000	1,000-1,500	1,500-3,000	3,000+
3-4 Door / Medium	500-900	900-1,500	1,500-2,500	2,500-4,000	4,000+
5+ Door / Large	900-1,500	1,500-2,500	2,500-3,500	3,500-5,500	5,500+

Budget branch: wardrobe size/door group. Sliding/hinged, mirror, drawers, LED and internal configuration remain attributes.

4.8 Storage & Casegoods

Product / Size	Essential	Value	Standard	Premium	Luxury
Chest of Drawers / Dresser	150-400	400-700	700-1,200	1,200-2,500	2,500+
Bedside Table / Nightstand	50-200	200-400	400-700	700-1,200	1,200+
TV Unit / Media Console	100-400	400-800	800-1,500	1,500-3,000	3,000+
Sideboard / Cabinet	200-600	600-1,000	1,000-1,800	1,800-3,000	3,000+
Bookcase / Shelving	100-300	300-600	600-1,000	1,000-2,000	2,000+
Shoe Cabinet	100-250	250-450	450-800	800-1,500	1,500+

Dressing tables with mirror are not included in Chest of Drawers / Dresser. Full-wall media storage systems should not be compared as ordinary TV consoles. Simple open shoe racks are excluded from Shoe Cabinet.

4.9 Lighting

Product / Size	Essential	Value	Standard	Premium	Luxury
Table Lamp	20-100	100-200	200-400	400-800	800+
Floor Lamp	30-150	150-300	300-600	600-1,200	1,200+
Pendant Light	30-150	150-300	300-600	600-1,200	1,200+
Chandelier	100-400	400-800	800-1,500	1,500-3,000	3,000+
Ceiling Light / Flushmount	30-150	150-300	300-600	600-1,200	1,200+
Wall Light / Sconce	30-100	100-200	200-400	400-800	800+

Price refers to a complete lighting product, not a separate shade or base. Technical features remain attributes.

4.10 Rugs

Product / Size	Essential	Value	Standard	Premium	Luxury
Small - approx. 120x180 cm	30-150	150-300	300-600	600-1,200	1,200+
Medium - approx. 160x230 cm	100-250	250-450	450-800	800-1,500	1,500+

Large - approx. 200x300 cm	150-350	350-650	650-1,200	1,200-2,500	2,500+
Extra Large - approx. 250x350 cm+	300-600	600-1,000	1,000-1,800	1,800-3,500	3,500+

Budget branch: rug size. Material, weave, pile and handmade/machine-made remain attributes.

4.11 Soft Furnishings

Product / Size	Essential	Value	Standard	Premium	Luxury
Cushion	20-50	50-100	100-200	200-400	400+
Throw / Blanket	30-80	80-150	150-300	300-600	600+
Curtain - per panel	30-100	100-200	200-400	400-800	800+

Cushion means complete cushion (cover + filling). Curtain ranges apply to ready-made curtains per panel; made-to-measure curtains require separate pricing logic.

4.12 Decor & Accessories

Product / Size	Essential	Value	Standard	Premium	Luxury
Mirror	50-200	200-400	400-800	800-1,500	1,500+
Wall Art	30-150	150-300	300-600	600-1,200	1,200+
Vase	20-80	80-150	150-300	300-600	600+
Decorative Object / Sculpture	30-100	100-250	250-500	500-1,000	1,000+
Candle Holder / Lantern	20-75	75-150	150-300	300-600	600+
Planter	20-100	100-250	250-500	500-1,000	1,000+

Fine art / collectible sculpture is excluded. Wall Art and Vase sets use total set price. Candle consumables are excluded. Planter price excludes live/artificial plants.

5. Customer-Facing Budget Experience

For each eligible product type, AIDOOi should present five visual budget cards. Each card contains:

- Tier name.
- Numeric AED range for the selected product type and capacity/size, if applicable.
- A representative product image relevant to the same product type and tier.

The customer chooses a range rather than entering a free-text budget in the MVP. Product capacity or size is requested first only where it is required to select the correct range table.

6. System Matching Logic

- Step 1: Identify the requested Product Type.
- Step 2: If the product uses a capacity/size branch, capture that branch first.
- Step 3: Load the five AID-LOG-001 ranges for that exact product context.
- Step 4: Customer selects a Budget Tier.
- Step 5: Match active seller offers using Current Selling Price.
- Step 6: Continue with Style and Colour preferences using the relevant AID-DATA standards.
- Step 7: Rank eligible products for Recommendation.

A product's tier is determined by its current purchasable price in the applicable range. Product identity, style, material, and quality attributes are not inferred from the tier name alone.

7. Relationship to Other AIDOOi Standards

- AID-DATA-007 Product Colour Standard - used after budget selection for colour matching.
- AID-DATA-009 Product Style Standard - used after budget selection for style matching.
- AID-DATA-010 Product Pricing Standard - defines offer-level price storage and current/original price handling.
- AID-DATA-011 Product Availability & Inventory Standard - only purchasable/eligible offers should be recommended.
- AID-CAT-001 to AID-CAT-008 - define product taxonomy and category-specific practical attributes.
- AID-SPC-009 Individual Product Path - uses category selection and activates the relevant product price logic.
- AID-LOG-002 - future Room Budget & Composition Logic; will consume AID-LOG-001 rather than duplicate product prices.
- AID-LOG-003 - future Whole Property Budget Logic for Studio, Full Apartment and Villa; will build on room/project composition logic.

8. Governance and Revision

- These ranges are manually defined MVP ranges approved for initial AIDOOi implementation.
- Ranges are configuration data and may be revised without changing canonical product IDs.
- Future revisions should use real AIDOOi inventory distribution, retailer mix, conversion data, and market movement.
- Any range change should be versioned and applied consistently across customer-facing cards and backend matching.
- Do not silently redefine a tier for one interface while keeping different numeric logic in another.

9. MVP Exclusions / Future Pricing Logic

- Room-level composition budgets: Living Room, Bedroom, Dining Room, Home Office.
- Whole-property budgets: Studio Apartment, Full Apartment, Villa.
- Made-to-measure curtains.
- Original fine art / collectible sculptures.
- Full-wall/custom media storage systems where pricing is project-like rather than product-like.
- Installation/service pricing unless explicitly part of a product system such as Murphy Bed structure logic.
- Dynamic inventory-derived tier boundaries - deferred until sufficient live data exists.

10. Standard Summary

AID-LOG-001 is the centralized product-level price intelligence layer for AIDOOi. It does not define what a room or property should cost. Instead, it provides controlled product price ranges that future room and whole-property budget standards can consume. This separation keeps product pricing maintainable, prevents duplicated ranges, and allows project budgets to update when product-level ranges change.
